(57) **CLAIM**

The ornamental design for a trim panel, as shown and described.

DESCRIPTION

FIG. 1 is a perspective view of a trim panel according to our new design;
FIG. 2 is a perspective view of the trim panel;
FIG. 3 is a front view of the trim panel;
FIG. 4 is a top view of the trim panel;
FIG. 5 is a bottom view of the trim panel;
FIG. 6 is a left side elevational view of the trim panel; and,
FIG. 7 is a right side elevation view of the trim panel.

The broken lines in FIG. 1 show portions of a truck, and in FIGS. 4-7 show rear elements of a trim panel and form no part of the claimed design.

The trim panel shown in FIGS. 1-7 illustrates a first embodiment of our novel design suitable for use on the driver's side of a motor vehicle. Our novel design also includes a second embodiment suitable for use on the passenger's side of the motor vehicle, which is mirror symmetrical to FIGS. 1-7, and therefore, not separately illustrated.

1 Claim, 5 Drawing Sheets
